
POSITION: Intern Chemistry, Manufacturing & Controls (CMC)

Date: 03/10/2025**Type of contract:** Internship**Field:** Biotech / Health / Antibiotic resistance**Working time:** Full-time**Location:** Lyon Gerland, France**Workplace type:** On-site**Ref:** ATX25-11**Start date:** February 2026

Become part of a team of 30 employees, united by strong values: excellence, shared vision, team spirit and respect. In our dynamic and multicultural environment, you will actively contribute to rewarding projects while developing your skills. We offer you an environment conducive to professional and personal growth. Let's build the future together!

Presentation of the company:

AUROBAC THERAPEUTICS is a biopharmaceutical company founded in 2022 by three highly renowned life sciences innovation companies, Boehringer Ingelheim, Evotec and bioMérieux.

Dedicated to addressing high unmet medical needs associated with infections and their complications in acute hospital settings, amidst the growing antimicrobial resistance (AMR) epidemic, AUROBAC is advancing a robust pipeline of drug candidates.

With strong growth, within an international environment, the company is now looking for a **CMC Intern**.

Description:

As an Intern CMC at AUROBAC, you will integrate the CMC team and contribute to the development activities of our products.

You will report to Head of CMC and work closely with Project Management, Quality Operations & Regulatory Affairs teams.

Missions:

- **Contribute to the oversight of process development & analytical activities conducted by CDMOs**
 - ✓ Monitor development plan execution, timelines & deliverables, identify and escalate risks
 - ✓ Participate to regular project meetings with CDMOs, produce/review agendas & minutes, monitor and complete CDMO action tracker
 - ✓ Review and manage technical documentation (recording in intranet & sharepoints, version follow-up, communication tracking), analyze and interpret results
- **Ensure reporting, action follow-up and communication with project team**
 - ✓ Complete internal trackers for project action follow-up
 - ✓ Share progress of development activities
 - ✓ Produce material to support decision making

- **Contribute to CMC department transversal activities**
 - ✓ Update CMC database when data is generated
 - ✓ Manage stock, supply & dispatch activities
 - ✓ Contribute to continuous improvement initiatives to enhance product quality, efficiency, and cost-effectiveness, in close collaboration with external partners / CDMOs
- **Carry out literature research & technological/regulatory intelligence in accordance with project needs (excipients, formulation techniques, guidelines...)**
 - ✓ Summarize and communicate on information of interest
 - ✓ As needed, suggest product or process development strategies adapted to ATX Programs

Personal skills:

- Fluency in English is a must-have
- The candidate is rigorous, involved and demonstrates excellent organizational and communication skills.

Experience:

- Student (BAC + 5/6) in pharmacy, chemical engineering, Master of Sciences.
