

PRESS RELEASE

Synthelis celebrates its 5 years anniversary and thanks its customers and team for being part of its success!

Grenoble, June 21st 2016 – Synthelis, a French biotech company, specialized in cell-free production, purification and characterization of membrane proteins and other hard to express proteins, announced today its anniversary celebration.

“We are very pleased today to celebrate Synthelis 5th year anniversary. We want to say thank you to everyone who supported us, worked with us and believed in us. The past 5 years have been quite exciting for Synthelis and thanks to the work and effort of our team and partners we are able to celebrate today these accomplishments and continue offering you our expertise and technological platform. So here’s to many more exciting years working together!” said Bruno Tiller, Synthelis CEO.

Throughout these past 5 years, Synthelis developed its activity in France and internationally with a customer portfolio including 7 of the 10 biggest Pharmaceutical companies. With more than 80 proteins produced for its customers, Synthelis has become a key player in cell-free protein production and has been awarded many times for its development, and particularly for its international coverage (BPI France, Ubistart, Grex Award).

About Synthelis

Since 2011, Synthelis, a French biotech company, has specialized itself in cell-free production, purification and characterization of membrane proteins and other difficult-to-express proteins. Synthelis offers products and services based on its patented cell-free technology. Thanks to this expertise, we can produce membrane proteins in proteoliposomes or solubilized in detergent. Synthelis can answer various applications such as screening and display technologies, vaccine and antibody development, protein delivery, in vitro diagnostics and structural biology.
