

## EVEON and JBT HubUp announce a unique partnership agreement for the customized development and the manufacturing of medical devices

**Lyon, November 27<sup>th</sup>, 2017 – Seven French companies have sealed a unique partnership called JBT HubUp. This entrepreneurial collaboration offers to the pharmaceutical and medical industry a unique solution for developing innovative medical devices by gathering all necessary skills, from day one of the project for a global and complete consideration of all objectives : from design to qualification through components manufacturing and their assembly.**

This unique French national alliance represents a turnover of 100 million euros with 11 worldwide production sites and 3 000 m<sup>2</sup> of cleanrooms. With over 850 people, these seven key players cover the complete necessary skills to speed-up and successfully enable innovative medical devices development.

Depending on projects and on required skills, these companies can count on the recognized experience of each partner, namely, plastic injection and mold manufacturing (Groupe JBT), design and registration of medical devices (Opia Technologies), industrialization and project management (Sibaya BCPharMed), design and fabrication of machines and automatized production means (RDPM et ICM), design and development of connected fluidic devices (EVEON) and LSR silicone injection (Progress).

« We are proud to offer our customers the creation of this collective brainpower in order to, together, overcome the future health challenges. This is also the start of a great human and technologic journey » says Bruno Cochetoux, JBT HubUp General Manager.

JBT HubUp is composed of different sized companies all customer oriented, eager to propose solutions to facilitate and speed up the time to market. Once the necessary partners are identified for the need of the project, a unique interlocutor is appointed to take charge of the customer relationship. This representative understands and manages the complete activity for the customer from design phase to industrialization and automation of the assembly. He ensures the coordination of all partners who commit, in a team spirit to respect values such as loyalty and responsibility towards other partners, customers and suppliers.

EVEON designs, develops and markets innovative medical devices for the automated and secure preparation and delivery of drugs. Thanks to its unique technology platform, Intuity®, EVEON offers several families of medical device solutions according to the intended use. As part of the alliance, EVEON brings its expertise in this field and in design and production of connected devices. Thus, EVEON has been selected by medical device manufacturers to develop new generations of connected devices. “We are proud to be part of this dynamic JBT HubUp and bring our specific skills and know-how to the customers to support the development of their innovative medical devices that meet the challenges of preventive, predictive, personalized and participative medicine” said Vincent Tempelaere, CEO of EVEON.

### **About JBT HubUp**

JBT HubUp is a company and an entrepreneurial alliance which offers to the pharmaceutical and medical industry a unique solution for developing innovative medical devices by gathering all necessary professional skills from day one of a project : from design to qualification through components manufacturing and their assembly.

This alliance groups over 850 employees out of 11 worldwide production sites with over 3000 m<sup>2</sup> of clean rooms and a turnover of 100 million euros. The development team counts over 80 engineers and technicians and 20 project managers. JBT HubUp will attend the next Pharmapack Europe exhibition in Paris on February 7&8, 2018.

### **About EVEON**

Created in 2009, EVEON specializes in smart medical devices for safe and automatic preparation and administration of drugs. The medical devices developed ensure that the administered treatment is controlled, precise and constant, and are a guarantee of comfort and efficacy for patients and health professionals, at home or in medical and hospital environments.

Thanks to its unique technology platform Intuity®, EVEON offers several families of medical device solutions according to the intended use. Protected by 13 patent families, EVEON medical devices are tailor-made for its customers and users.

As an ISO 13485 and ISO 9001 accredited company, EVEON has received many awards, including:

- Two years in a row, the Pharmapack Europe Award Best Innovation Exhibitor, with special mentions *Convenience and Ease of use* in February 2016. (Intuity® Mix) and *Ease of use and Patient Compliance* in February 2017 (Intuity® Ject),
- 2<sup>nd</sup> prize from the Alliance pour le Génie Biologique et Médical (the Alliance for Medical and Biological Engineering) in July 2015,
- 1<sup>st</sup> prize at the RTS/France 3 sponsored international competition Invent tomorrow in December 2014.

EVEON will attend the next Pharmapack Europe exhibition, booth B48 in Paris on February 7&8, 2018.
