We help care services to improve and transform their catering and nutrition performance

Creating nutrition lead solutions that cover every aspect of your expertise

We make technology user friendly

Based in **Lyon**, capital of gastronomy, Orexial develops and supplies innovative software solutions targeting better efficiency for **nutrition and catering** in care services.

- Real time client satisfaction
- The only app specifically designed for large companies

- The first **interoperable** solution to fight **undernutrition** in retirement homes

- The first sectorial publishing about care services catering

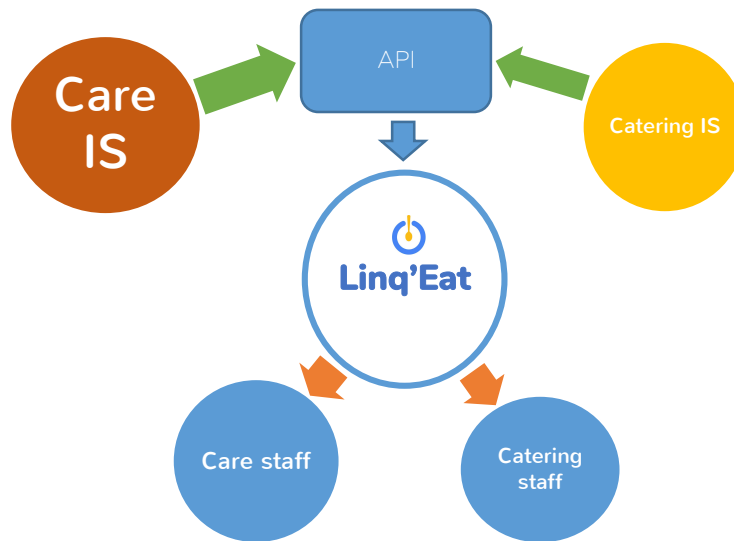

# Linq'Eat

Fight undernourishment with efficiency

- Perform better nutrition care with Linq'Eat
- > A realistic production that **reduces food waste** and increases profitability
- > Automated data control that **reduces errors'** risk
- > Less time calculating food needs = **more time for patients**
- > A tailor-made approach that **improves the well-being** of patients
- > Assistance in the **early diagnosis of undernutrition**
- > **GDPR** and healthcare data hosting french norms **compliant**

# Le baromètre Orexial

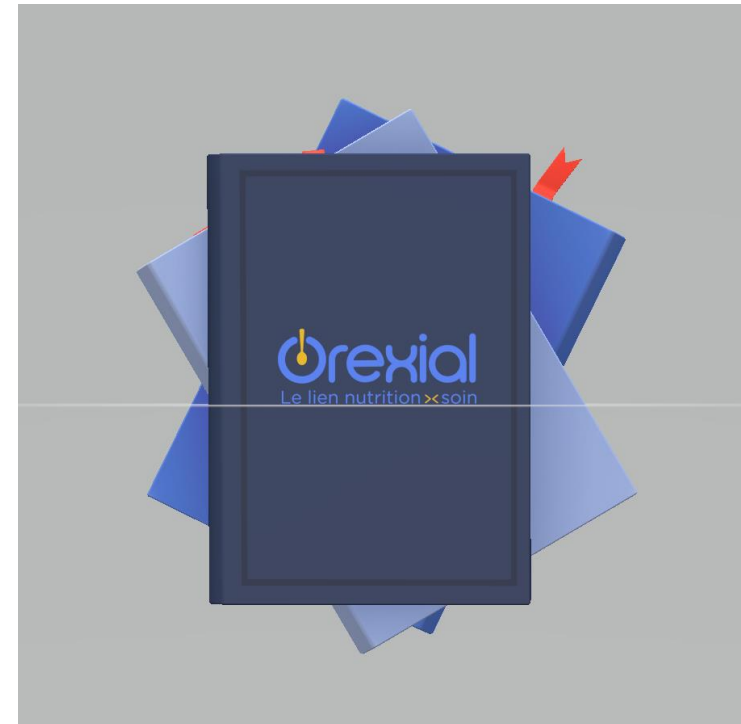

The first sectorial publishing about care services catering

Orexial developed a lite version of the powerful CareAdvisors app: any care service manager can create a **free user account** and use three specific surveys about his catering service.

Not only can CareAdvisors lite users visualize and **manage their patients satisfaction**, they also can benefit from a **specific consulting** to help them significantly improve their level of satisfaction.

Le Baromètre Orexial is the very first care services catering benchmark in France.
